About ZNK

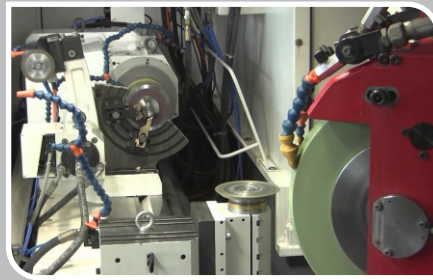

We are a globally ambitious bearing manufacturer delivering precision, performance, and partnership at scale. Built on a foundation of technical expertise and uncompromising standards, we specialize in manufacturing high performance bearings designed to meet the evolving demands of modern automotive and industrial applications.

Every bearing we produce is the result of rigorous engineering, advanced manufacturing technologies, and a deep understanding of real-world operating conditions. From standard ranges to fully customized specifications, we ensure our clients receive solutions that enhance efficiency, reliability, and operational longevity.

We are passionate about delivering exceptional value to our customers and partners globally. We believe in creating meaningful business relationships built on reliability, innovation, and mutual growth.

We welcome opportunity to build strong partnership and look forward to a long-term cooperation in the future.

Quality & Facilities

Our facilities are supported by advanced design, modelling, metallurgical analysis, and precision measurement systems, our manufacturing operations are engineered to maintain stringent dimensional tolerances and consistent product quality. Every bearing undergoes rigorous inspection and testing, including dimensional accuracy verification, roundness evaluation, vibration and noise analysis, surface finish assessment, and material integrity validation.

From dimensional accuracy and surface integrity to vibration, noise, and performance validation, products are being inspected to ensure consistent quality.

Product Offering

ZNK develops & manufactures and markets premium quality bearings.
We offer exclusive array of vast kind of bearings in our product range.

Deep Groove Ball Bearings

6000 series
6200 series
6300 series
6400 series

16000 series

Also available in Z, ZZ, RS, 2RS
RLS, RMS, XLJ

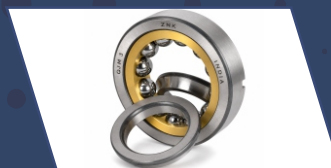

Angular Contact Ball Bearings

7000 series
7200 series
7300 series

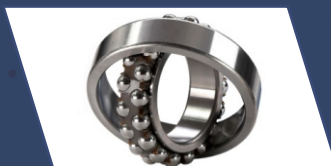

3200 series
3300 series

Four Point Contact Ball Bearings

QJ 200 series
QJ 300 series
QJM series

Self Aligning Ball Bearings

1200 series
1300 series
2200 series
2300 series

NMJ series
NLJ series

Cylindrical Roller Bearings

N - 200, 300, 400, 2200, 2300 series
NJ - 200, 300, 400, 2200, 2300 series
NU Series - 200, 300, 400, 2200, 2300 series
NUP Series - 200, 300, 2200, 2300 series
JC series

Taper Roller Bearings

30200 series
30300 series
31300 series
32000 series
32200 series

32300 series
33000 series
33100 series
33200 series

All Type of Single Row, Double Row
and Four Row Taper Roller Bearings,
Also available in Inch series

Spherical Roller Bearings

21300 series
22200 series
22300 series
23000 series

23100 series
24000 series
476200 series

29200 series
29300 series
29400 series

Also available in brass cage

Thrust Ball Bearings

51100 series
51200 series
51300 series
51400 series

Needle Roller Bearings

NA 4900 to NA 4924
NA 6902 to NA 6924
NK 10/12 to NK 105/36
NKI 10/16 to NKI 100/40

NKIS 17 to NKIS 100
K 4x7x7 to K 100x108x30

Extended Inner Ring Bearing

476200 Series

Pillow Block Bearings

UC series
UCP series

**We also offer customized special bearing manufacturing
as per customer's design and specification.**

Precision Engineering Excellence

Manufactured with advanced technology ensuring micron level accuracy.

Consistent Quality Assurance

Manufactured with advanced technology ensuring micron level accuracy.

Application driven Solutions

Customized bearing solutions tailored to specific industrial and automotive needs.

High Load & High-Speed Performance

Designed for demanding operational environments with superior durability.

Global Supply Capability

Efficient logistics and scalable production for international markets.

Team **ZNK**

Driven by technical excellence and guided by a customer-centric philosophy, our team is dedicated to building lasting partnerships through innovation, integrity, and uncompromising quality. It is this collective commitment that enables us to earn the trust of customers across domestic and international markets and position ourselves as a preferred partner in the global bearing industry.
